

Programme Schedule for
Master programme in Software Engineering, 60 credits
Programme code: ZCG20

Valid for the academic year 2018/2019

About the programme schedule

Every degree programme has an established programme syllabus which includes all the courses in the programme. The programme syllabus is supplemented annually by a programme schedule stating in which study period a programme course is run, in which city it takes place, whether it collides with another course and so on. The programme schedule is valid for one year at a time.

Courses which belong to the main field of study for a degree have been marked with "X" in the column MF.

K1, K2 etc. in the study period columns indicate their timetable positions and show whether the courses collide or not. Courses with the same K value collide, and courses with different K values do not collide. Courses with the value "X" can collide with other courses in the study period.

The following applies to current collision codes/K values:

K1 = Monday pm + Wednesday am

K2 = Monday am + Thursday am

K3 = Tuesday am + Thursday pm

K4 = Tuesday pm + Friday am

K5 = Wednesday pm + Friday pm (K5a = Wednesday pm, K5b = Friday pm)

The program schedule shows the courses that you have a guaranteed place to for the particular study period and programme semester. "E" indicates that the course is given in Eskilstuna and "V" that it is given in Västerås.

The course syllabus will give information if the course is overlapping another course. You can only use overlapping credits once in a degree. Please contact your Study Adviser for more information.

Level and Classification of Progressive Specialisation

The University uses the following designations for the classification of progressive specialisation, where “G” indicates that the course belongs to a programme at first-cycle level and “A” that the course belongs to second-cycle level:

G1N	course with only upper secondary school entry requirements
G1F	course with less than 60-credit course/courses at first-cycle level as entry requirements
G1E	course including a specially-designed degree project for a higher education diploma
G2F	course with at least 60-credit course/courses at first-cycle level as entry requirements
G2E	course with at least 60-credit course/courses at first-cycle level as entry requirements and which includes a degree project for a Bachelor's degree
A1N	course with only course/courses at first-cycle level as entry requirements
A1F	course with course/courses at second-cycle level as entry requirements
A1E	course which includes a degree project for a Master's degree (60 credits)
A2E	course which includes a degree project for a Master's degree (120 credits)

Choice within the programme

During the course of your education you can be given the possibility of choosing courses within the programme. You will make your choices together with your program coordinator.

When you make your choices you must always base these on the programme syllabus together with the degree requirements for the degree you wish to obtain. Please contact your Program coordinator or Study Adviser for more information.

To be able to be admitted to a course you must always fulfil the specific eligibility requirements which are stated in the course syllabus, regardless of whether you have a guaranteed place or not.

Other information

Depending on the number of applicants for the individual courses, courses may be cancelled. The courses are given in English.

Terms 1 and 2 for program starting in autumn term 2018

MF	Main Field /Course name	Course code	Level	Credit	Study periods								Speed	City
					HT1		HT2		VT1		VT2			
					a	b	a	b	a	b	a	b		
	Computer Science													
X	Research methods in computer science	DVA463	A1N	7,5	K3	K3							50%	V
X	Software Engineering 1: Basic Course	DVA332	G2F	7,5	K1	K1							50%	V
X	Software Verification and Validation *	CDT414	A1N	7,5			K3	K3					50%	V
X	Safety Critical Systems Engineering *	DVA437	A1N	7,5			K2	K2					50%	V
X	Model-Driven Engineering *	DVA436	A1N	7,5							K2	K2	50%	V
X	Thesis for the Degree of Master of Science (60 credits) in Computer Science with Specialization in Software Engineering *	DVA423	A1E	15					X	>	>	>	50%	V
	Mathematics/Applied Mathematics¹													
	Mathematics of Internet	MAA507	A1N	7,5					K3	K3			50%	V

¹ Students who have not completed 30 ECTS credits in mathematics as part of previous studies, must choose at least 7,5 ECTS credits in mathematics at level G1F or higher.

¹ Optional courses can be taken with the approval of the Program coordinator. CDT401 or DVA444 (instead of DVA332) can be taken by those who have sufficient background in Software Engineering.

*) This is a course at advanced level within the specialization in Software Engineering.

MF	Main Field /Course name	Course code	Level	Cred	Study periods								Speed	City
					HT1		HT2		VT1		VT2			
					a	b	a	b	a	b	a	b		
	Optional/additional coursesⁱⁱ													
	Computer Science													
X	Industrial Systems in Cloud Computing *	DVA444	A1N	7,5	K5	K5						50%	V	
X	Distributed Software Development *	CDT402	A1N	7,5	K4	K4	K4	K4				25%	V	
X	Component Technologies *	CDT401	A1N	7,5	K2	K2						50%	V	
X	Industrial System Development *	CDT417	A1N	7,5		K1	K1					50%	V	
X	Software Engineering 2: Project teamwork	DVA313	G2F	7,5			K1	K1				50%	V	
X	Software Engineering 3: Software Architecture and Processes *	DVA422	A1N	7,5					K1	K1		50%	V	
X	Advanced Component-based Software Engineering *	DVA449	A1N	7,5					K5	K5		50%	V	
X	Software Development for Real-Time Systems *	DVA455	A1N	7,5							K4	K4	50%	V
	Mathematics/Applied Mathematics													
	Numerical Methods with MATLAB	MMA307	G1F	7,5	K1 + K5b	K1 + K5b						50%	V	
	Numerical Methods with MATLAB	MMA307	G1F	7,5					K1 + K5b	K1 + K5b		50%	V	

ⁱ Students who have not completed 30 ECTS credits in mathematics as part of previous studies, must choose at least 7,5 ECTS credits in mathematics at level G1F or higher.

ⁱⁱ Optional courses can be taken with the approval of the Program coordinator. CDT401 or DVA444 (instead of DVA332) can be taken by those who have sufficient background in Software Engineering.

*) This is a course at advanced level within the specialization in Software Engineering.
