

Programme Schedule for Master's Programme in Physiotherapy with specialization in Behavioural Medicine within Health and Social Welfare, 120 credits

Programme code: AMM11

Valid for the academic year 2021/2022

About the program schedule

Every degree program has an established program syllabus in which all the courses included in the program appear, divided up by term. The programme syllabus is supplemented annually with a programme schedule stating in which study period a programme course is run, in which city, if it collides with another course, and so on. The programme schedule is valid for one year at a time.

In the column "Overlapping courses" is indicated courses that wholly or partly overlap with the current course on that row. If you have read overlapping courses you may only be accredited with overlapping credits once in a degree. An "X" in the column means that there are no overlapping courses. Contact your Study Adviser for more information.

Choice within the programme

During your studies you can be given the possibility of choosing courses within the programme. The choice is made by 15 April at the latest for an autumn term and by 15 October at the latest for a spring term. Prior to these choices the host School will provide information about the different options and about how to choose.

When you make your choices, you must always base these on the programme syllabus together with the degree requirements for the degree you wish to obtain. Contact your Study Adviser for more information.

To be able to be admitted to a course you must always fulfil the specific eligibility requirements which are stated in the course syllabus, regardless of whether you have a guaranteed place or not. For more information about choice of courses, see Mälardalen University's website Application for courses within programmes (<https://www.mdh.se/en/malardalen-university/student/study-guide/application-for-courses-within-programmes--?>). See also the local System of Qualifications, which contains all the qualification descriptors.

Other information

Depending on the number of applicants for the individual courses, courses may be cancelled. You should therefore state reserve alternatives when choosing courses.

The courses are given in English.

Level and Classification of Progressive Specialisation

The University uses the following designations for the classification of progressive specialisation, where “G” indicates that the course belongs to a programme at first-cycle level and “A” that the course belongs to second-cycle level:

- G1N course with only upper secondary school entry requirements
- G1F course with less than 60-credit course/courses at first-cycle level as entry requirements
- G1E course including a specially-designed degree project for a higher education diploma
- G2F course with at least 60-credit course/courses at first-cycle level as entry requirements
- G2E course with at least 60-credit course/courses at first-cycle level as entry requirements and which includes a degree project for a Bachelor’s degree
- GXX course which cannot be classified according to the above model
- A1N course with only course/courses at first-cycle level as entry requirements
- A1F course with course/courses at second-cycle level as entry requirements
- A1E course which includes a degree project for a Master’s degree (60 credits)
- A2E course which includes a degree project for a Master’s degree (120 credits)
- AXX course which cannot be classified according to the above model

Terms 1 and 2 for programme started in the autumn term 2021
