Objectives
• From an engineering change perspective, identify competitive concepts for production and installation of offshore converter platforms with respect to flexibility, sustainability and reliability

Current status
• Developing a participatory action approach for the research in the period leading up to the doctorate thesis

Planned activities
• Establish new case companies within the offshore industry
• Planning prescriptive studies into engineering change management process organisation and handling

Supervisors
• Main supervisor: Monica Bellgran, MDH
• Assistant supervisor: Björn Fagerström, ABB/MDH
• Assistant supervisor: Peter Sandeberg, ABB
