Change management triggered by environmental requirements in production system

Objective
• To develop a model providing a systematic approach for the implementation of changes triggered by environmental requirements

Current status
• Presented the licentiate thesis "Model for change in production systems triggered by environmental requirements – considerations, drivers, key factors", April 2015
• Two empirical studies and two literature reviews conducted

Planned activities
• Develop research clarification for the next phase
• Evaluate the model in ongoing projects in the operations
• Study the decisions, initiations and roles in environmental driven changes

Supervisors
• Main supervisor: Mats Deleryd, MDH, Volvo CE
• Co-advisor: Anders Fundin, MDH, Volvo CE
• Industrial advisor: Niklas Nillroth, Volvo CE
• Additional co-advisor: Lennart Swanström, ABB
